Waste Management
Made in Germany

Export Initiative

Recycling and Efficiency Technologies

Environment and economy: two sides of the same coin

The Export Initiative Recycling and Efficiency Technologies, RETech, was established in 2007 in order to support the development of sustainable waste management systems worldwide, thereby enhancing export prospects for waste management technologies and services “Made in Germany”. RETech supports its stakeholders in exporting waste management concepts, services and products to industrialized countries, emerging markets and developing countries. RETech’s instruments are the transfer of German waste management know-how, the export of technologies, and the improvement of regulatory frameworks in countries that do not yet dispose of an efficient waste management system. RETech’s central platform is the internet portal www.retech-germany.de. It provides information and possibility for interaction for German and international users, including waste management companies, public sector and private institutions and universities.

Sustainable waste management means

- ▶ better environmental protection
- ▶ higher resource efficiency
- ▶ better climate protection
- ▶ higher employment
- ▶ new innovations and investments

RETech’s goals

- ▶ to develop and strengthen international waste management standards
- ▶ to develop environmental awareness worldwide
- ▶ to assist companies and institutions interested in German waste management technologies
- ▶ to support know-how transfer and training capability

RETech’s principles

- ▶ supporting self-help, e.g. for municipalities and SMEs
- ▶ focus on selected regions, e.g. Eastern Europe, North Africa, BRIC countries
- ▶ development of waste management solutions adapted to general local conditions

RETech's activities

For companies and institutions from abroad:

- ▶ comprehensive information on German waste management technologies and services
- ▶ inquiry service for information and contacts all around the German waste management sector
- ▶ procurement of possibilities for waste management training and education in Germany
- ▶ brokerage of contacts to German waste management companies and institutions

For German companies and institutions:

- ▶ high-quality information, e.g. recycling technologies, CDM-waste projects, contacts to industry experts
- ▶ organisation of international conferences, high-level panels, political and technical discussions
- ▶ network of ministries, academia, industrial and trade associations, SMEs and local authorities

Internet portal www.retech-germany.de:

All you want to know about waste management technologies and services "Made in Germany".

The Internet portal www.retech-germany.de is operated by the contact point at Germany Trade & Invest, the foreign trade and inward investment agency of the Federal Republic of Germany. It provides information on German waste management

- ▶ technologies
- ▶ services
- ▶ standards and legislation
- ▶ companies (RETech directory)
- ▶ universities and training institutes (map of German education and research hot spots)

RETech's network

consists of German and international institutions that are involved in the promotion of modern waste management technologies and services. Its players collaborate in order to

- ▶ combine competences
- ▶ elaborate joint strategies
- ▶ share sector- and company-oriented information
- ▶ develop joint projects

Facts and figures

- ▶ Around 6,000 companies operate in Germany's waste management industry, employing more than 200,000 people.
- ▶ With a share of around 25 percent, Germany is the world's leading exporter of closed cycle management technologies.
- ▶ In 2003 the dynamic on the international markets for recycling and disposal technologies accelerated significantly with around 21 percent per year.
- ▶ According to Federal Environment Ministry figures, annual turnover in the waste management industry in Germany is

around 50 billion euro. The global market for waste management and recycling plants alone is estimated at 35 billion euro.

- ▶ The market for automated material separation systems looks set to have particular good opportunities for growth. Experts predict that this market will grow by 15 percent p.a. over the coming years, to as much as 1.5 billion euro in 2020.
- ▶ Investments needed in waste management for the period 2007 to 2020, e.g. in Russia, Turkey and ASEAN countries, are estimated at around 44 billion euro.
- ▶ Exports are expected to generate production in Germany to a value of around 9.7 billion euro.
